5.1 The classification of candidates will be organized in descending order, based on the calculation of the Candidate's General Average (MGC), based on the arithmetic average of the Language and Mathematics Grades that correspond, respectively, to the Areas of Languages, Codes and its Technologies and Mathematics and its Technologies, with up to two decimal places separated by point, considering the data contained in the High School Transcript (or equivalent course) or in the High School Certification issued by the certifying institutions, indicated by the candidate on the

Application Form for this Selection Process.

5.2. In the case of using the Academic Transcript, with the identification of grades for each of the series studied during High School (or equivalent course), for the calculation of the Language and Mathematics Grades that correspond, respectively, to the Areas of Languages, Codes and its Technologies (NLCT) and Mathematics and its Technologies (NMT), consider the following formulas:

$$NLCT = \frac{(N1SLP) + (N2SLP) + (N3SLP)}{3}$$

$$NMT = \frac{(N1SM) + (N2SM) + (N3SM)}{3}$$

Description:

NLCT - Language Note that corresponds to the Area of Languages, Codes and their Technologies,

N1SLP - Grade referring to the 1st Grade of High School in the Languages subject,

N2SLP - Grade referring to the 2nd Grade of High School in the Languages subject,

N3SLP - Grade referring to the 3rd Grade of High School in the Languages subject,

NMT - Mathematics Grade corresponding to the Area of Mathematics and its Technologies (Mathematics),

In the case of using the High School Transcript (or equivalent course) issued from the adoption of an evaluation system on a numerical scale different from 0 (zero) to 10 (ten) points, for the indication of Language and Mathematics that correspond, respectively, to the Areas of Languages, Codes and their Technologies and of Mathematics and their Technologies, the educational institution must inform the equivalence between the two scales and the information can be given in the document of proof of schooling, presented by the candidate or in a letter to be presented at the time of registration.

5.3.1. In the event that the educational institution does not inform the correspondence between the scales, the numerical grades recorded in the schooling document must have their values converted, by the candidate (Annex III), proportionally to the scale from 0 (zero) to 10 (ten), considering the maximum value of the scale adopted by the educational institution as corresponding to grade 10 (ten).

5.4. In the case of using the High School Transcript (or equivalent course) with grades recorded in the form of Concepts, without information on the corresponding numerical values, for the indication of the Language and Mathematics Grades that

correspond, respectively, to the Language Areas , Codes and their Technologies and Mathematics and its Technologies, the candidate must consider the equivalence between the Concepts and Grades converted to a scale of 0 (zero) to 10 (ten) points, according to ANNEX III - TABLE OF EQUIVALENCE BETWEEN CONCEPTS AND NOTES of this Public Notice.

5.5. In the event of a tie, the tie will be broken considering the criteria in the following order:

- I. Highest Score obtained in Languages corresponding to the Area of Languages, Codes and their Technologies;
- II. Highest Grade obtained in Mathematics corresponding to the Mathematics Area and its Technologies;
